GET IN TOUCH

Burj Tech Consultancy, founded in 2025 and headquartered in Putlur, Thiruvallur District, Tamil Nadu, is more than just a technology company — we are a team of creators, innovators, and solution architects dedicated to shaping the future of digital experiences.

We specialize in delivering custom software, mobile applications, e-commerce platforms, and web applications tailored to the unique needs of modern businesses. From startups to enterprises, we empower our clients through cutting-edge technologies like Flutter, React Native, MERN Stack, and Next.js.

Driven by our vision to become a globally recognized leader in IT solutions, we are committed to innovation, inclusivity, and transforming industries through impactful digital transformation.

ABOUT US

Our mission is to empower businesses and foster a thriving ecosystem of talent, creativity, and growth, while also delivering meaningful social impact through job creation, skill development programs, and cybersecurity awareness.

At Burj Tech Consultancy, we combine technology with a human touch, ensuring every solution is not only functional — but also purposeful.

ABOUT US

Software Development

We specialize in crafting tailored software solutions, developing high-performance mobile applications, and building responsive, user-friendly websites. Our end-to-end development approach ensures seamless functionality, intuitive design, and scalable technology to meet your unique business needs.

Cyber Security

We deliver cutting-edge security solutions with real-time threat detection to protect your data, systems, and infrastructure. Using AI-driven monitoring and proactive defenses, we identify and neutralize cyber threats before they cause harm—ensuring your business stays secure and resilient.

IT Infrastructure

We manage and maintain networks, hardware, and servers to ensure smooth, secure, and uninterrupted operations. Our expert team ensures system reliability, minimizes downtime, and optimizes performance to keep your IT infrastructure running efficiently around the clock.
